“We Care Because We Know You Care”

eDoc® Telemed/EHR Client Server Telemedicine Application

The **eDoc®** Telemed/EHR Client Server Telemedicine Application is a client-server based feature rich solution for telemedicine suitable for hospitals, rural area clinics or multi-physician practices with multiple specialties or multiple **eDoc®** Telemedicine Systems.

The application acts as the data accumulation and centralizing agent for all services, communications, storage, archiving and administration for the **eDoc®** Telemed/EHR Platform. It is ideally suited for mid and large deployments of the **eDoc®** Telemedicine Program enabling user's to manage their telemedicine program behind their own respective firewall for an added measure of security.

The **eDoc®** Telemed/EHR Client Server works with and in conjunction with both the “Desktop” and “Physicians Web Portal” versions of the **eDoc®** Telemed/EHR application software.

Features

- Provides data accumulation and centralizing agent for all practice/clinician/patient generated data involving a multi-station **eDoc®** Telemed/EHR System deployment
- Comprehensive tool suite to manage user accounts, offline data flow, generate reports, monitor services, and archive and restore data
- Provides robust performance with effective resource utilization and follows industry accepted strong security, compression, and communication standards
- Provides need-based scalability as plug-in-play **eDoc®** Systems
- Audit and log tracking of all users actions through Metering & Logging services
- Concurrent Access Control for secure and safe patient records handling
- Support for Medical Informatics Standards (DICOM and HL7)
- Compliant to Industry standard encryption, compression, and communication
- User can leverage flexibility in licensing models to balance between cost and feature/capability requirements
- Comprehensive “Virtual” Technical Support via live video conferencing and desktop sharing.

Minimum System Configuration Requirements

Server Class Computer running Microsoft Windows Server 2003/2008

SQL Server 2008 Device CAL for each **eDoc®** Telemedicine System
